

UNDER MY SKIN

A National Report of Patients' Experiences on the Impact of their Dermatological Conditions on their Mental Health

308

A total of **308 individuals** from every province and territory participated in the CSPA national survey, including:

ON 33% | BC 13% | AB 12% | QC 12%

91% patients
9% caregivers

Average age: **39 years**
Age range: **2 to 81**

45% condition onset
before age 18

44% respondents with
multiple conditions

"My condition was a major part of my depression. It made me feel nervous to go outside because I felt I would be judged for being dirty or contagious, and I started to disconnect from the outside world."

- Respondent with psoriasis

80%

Social life negatively affected in the last 30 days

EMOTIONAL IMPACT

75%

Reported moderate to severe impact on emotional health.

57%

Felt anxiety, worry, or nervousness often or always

SELF-ESTEEM

77%

Experienced a moderate to severe dip in self-esteem.

The impact of dermatological conditions extends beyond visible symptoms, influencing daily life and mental well-being significantly, yet many individuals are not accessing tailored mental health support.

48%

sought mental health support

75%

found mental health support helpful

Access to mental health support is crucial
